VOLUME CONTENTS

Number 1

S. Alexandrov and O. Richmond	1	Singular plastic flow fields near surfaces of maximum friction stress
L.-I. Palade and J.A. DeSanto	13	Dispersion equations which model high-frequency linear viscoelastic behavior as described by fractional derivative models
M. Massoudi	25	On the flow of granular materials with variable material properties
W.Q. Zhu and Z.L. Huang	39	Exact stationary solutions of stochastically excited and dissipated partially integrable Hamiltonian systems
R.R. Huilgol and Q.D. Nguyen	49	Variational principles and variational inequalities for the unsteady flows of a yield stress fluid
B.J. Thuruthimattam, A.M. Waas and A.S. Wineman	69	Stress transfer modeling in viscoelastic polymer matrix composites
H.M. Yehia	89	Equivalent mechanical systems with cyclic coordinates and new integrable problems
H.R. Öz, M. Pakdemirli and H. Boyacı	107	Non-linear vibrations and stability of an axially moving beam with time-dependent velocity
M.E. Fares and Y.G. Youssif	117	A refined equivalent single-layer model of geometrically non-linear doubly curved layered shells using mixed variational approach
A.H. Kara	125	On the conserved quantities and associated symmetries for some classes of perturbed wave equations with non-linearities
L.W. Morland and S. Sellers	131	Multiphase mixtures and singular surfaces
R. Usha and R. Ravindran	147	Numerical study of film cooling on a rotating disk
H.-J. Ko and G.S. Dulikravich	155	Non-reflective boundary conditions for a consistent two-dimensional planar model of electro-magneto-hydrodynamics (EMHD)
O. Millet, A. Hamdouni and A. Cimetière	165	A classification of thin plate models by asymptotic expansion of non-linear three-dimensional equilibrium equations
S. Tokarzewski and I. Andrianov	187	Effective coefficients for real non-linear and fictitious linear temperature-dependent periodic composites

Number 2

P. Vadasz	197	Equivalent initial conditions for compatibility between analytical and computational solutions of convection in porous media
C.B. Gan and W.Q. Zhu	209	First-passage failure of quasi-non-integrable-Hamiltonian systems
L.A. Wong and J.C. Chen	221	Nonlinear and chaotic behavior of structural system investigated by wavelet transform techniques
P. Vielsack	237	Stick–slip instability of decelerative sliding
C.A. Featherston	249	Imperfection sensitivity of flat plates under combined compression and shear
A. Raman and C.D. Mote Jr	261	Effects of imperfection on the non-linear oscillations of circular plates spinning near critical speed
A. Raman and C.D. Mote Jr	291	Experimental studies on the non-linear oscillations of imperfect circular disks spinning near critical speed
A. Akinola	307	An application of non-linear fundamental problems of a transversely isotropic layer in finite elastic deformation
G.M. Kulikov	323	Non-linear analysis of multilayered shells under initial stress
A. Maccari	335	Modulated motion and infinite-period bifurcation for two non-linearly coupled and parametrically excited van der Pol oscillators
F. Talay Akyıldız	349	A note on the flow of a third-grade fluid between heated parallel plates
T.R. Nordenholz and O.M. O'Reilly	353	A class of motions of elastic, symmetric Cosserat points: existence, bifurcation, and stability
G. Chakraborty and A.K. Mallik	375	Dynamics of a weakly non-linear periodic chain
	391	Corrigendum

Number 3

	393	Editorial
Ph. Boulanger and M. Hayes	399	Unsheared triads and extended polar decompositions of the deformation gradient
R.C. Batra	421	Comparison of results from four linear constitutive relations in isotropic finite elasticity

L.M. Brock	433	Rapid sliding contact on a highly elastic pre-stressed material
M.M. Carroll	443	Some universal deformations for a class of compressible elastic solids
J.M. Hill	447	A review of partial solutions of finite elasticity and their applications
C.O. Horgan and G. Saccomandi	465	Pure azimuthal shear of isotropic, incompressible hyperelastic materials with limiting chain extensibility
R.W. Ogden	477	Stress softening and residual strain in the azimuthal shear of a pseudo-elastic circular cylindrical tube
R.J. Knops	489	Uniqueness and continuous data dependence in the elastic cylinder
C.-S. Man and M. Huang	501	Identification of material parameters in yield functions and flow rules for weakly textured sheets of cubic metals
P. Cermelli and F. Pastrone	515	A simple approach to the problem of defect localization in an elastic body
M. Pitteri	523	Some remarks on conditions for twinning in crystals
G. Fadda and G. Zanzotto	527	Symmetry breaking in monoatomic 2-lattices
N.H. Scott	549	Thermoelasticity with thermomechanical constraints

Number 4

M.E. Fares and A. El-Gohary	565	Stochastic stabilization of the rotational motion of a rigid body using rotors
J.P. Braselton, M.L. Abell and L.M. Braselton	571	Generalized Walker solutions to the Landau–Lifshitz–Gilbert equations
A.A. Zevin and M.A. Pinsky	581	Localization of periodic motions in systems with angle coordinates
P. Bourgin and S. Saintlos	585	High-velocity coating flows and other related problems
P. Yu, W. Zhang and Q. Bi	597	Vibration analysis on a thin plate with the aid of computation of normal forms
T.G. Myers and J.P.F. Charpin	629	The effect of the Coriolis force on axisymmetric rotating thin film flows
M. Massoudi and E.J. Boyle	637	A continuum–kinetic theory approach to the rapid flow of granular materials: the effects of volume fraction gradient
H. Demiray	649	Modulation of non-linear waves in a viscous fluid contained in an elastic tube

A. El-Gohary 663 Global stability of the rotational motion of a rigid body containing moving masses

C.W. Soh and F.M. Mahomed 671 Linearization criteria for a system of second-order ordinary differential equations

H.-K. Hong and C.-S. Liu 679 Lorentz group on Minkowski spacetime for construction of the two basic principles of plasticity

X.B. Lu 687 The thermo-visco-plastic instability analysis of saturated soil

A. Elipe, A. Abad and A. Deprit 693 A resonance model on a cylinder

E. Momoniat 705 True contact transformations admitted by a class of non-linear wave equations

P.L. Chow and L. Maestrello 709 Vibrational control of a non-linear elastic panel

Number 5

M.K. Friedrich and D. Angirasa 719 The interaction between stable thermal stratification and convection under a heated horizontal surface facing downward

J.C. Misra, B. Pal, A. Pal and A.S. Gupta 731 Oscillatory entry flow in a plane channel with pulsating walls

A.M. Siddiqui, R.P. Burchard and W.H. Schwarz 743 An undulating surface model for the motility of bacteria gliding on a layer of non-Newtonian slime

Y.M. Fu and C.P. Chen 763 Non-linear vibration of elastic truncated conical moderately thick shells in large overall motion

W.Q. Zhu, Z.L. Huang and Y. Suzuki 773 Equivalent non-linear system method for stochastically excited and dissipated partially integrable Hamiltonian systems

A. Lahiri and M.S. Roy 787 The Hamiltonian Hopf bifurcation: an elementary perturbative approach

I. Rozhkov, A.F. Vakakis and R.H. Rand 803 Non-linear modal interactions in the oscillations of a liquid drop in a gravitational field

K. Lee 813 Post-buckling of uniform cantilever column under a combined load

F.-X. Mei 817 On the Birkhoffian mechanics

R. Ghanem and F. Romeo 835 A wavelet-based approach for model and parameter identification of non-linear systems

M. Lu and Q.-H. Qin 861 First- and second-order asymptotic solutions of fast fracture in an elastic–viscoplastic solid

Number 6

E. Momoniat, D.P. Mason and F.M. Mahomed 879 Non-linear diffusion of an axisymmetric thin liquid drop: group-invariant solution and conservation law

E. Bilgili, B. Bernstein and H. Arastoopour 887 Inhomogeneous shearing deformation of a rubber-like slab within the context of finite thermoelasticity with entropic origin for the stress

T. Hayat, S. Nadeem, S. Asghar and A.M. Siddiqui 901 Fluctuating flow of a third-grade fluid on a porous plate in a rotating medium

E. Esmailzadeh and A. Goodarzi 917 Stability analysis of a CALM floating offshore structure

S.K. Dwivedy and R.C. Kar 927 Non-linear dynamics of a slender beam carrying a lumped mass under principal parametric resonance with three-mode interactions

M.J. Whitney and G.J. Rodin 947 Force–velocity relationships for rigid bodies translating through unbounded shear-thinning power-law fluids

M. Yürüsoy, M. Pakdemirli and Ö.F. Noyan 955 Lie group analysis of creeping flow of a second grade fluid

M. Massoudi 961 Local non-similarity solutions for the flow of a non-Newtonian fluid over a wedge

J.P. Pascal 977 A model for two-layer moderate Reynolds number flow down an incline

J.G. Kingston and C. Sophocleous 987 Symmetries and form-preserving transformations of one-dimensional wave equations with dissipation

V.N. Pilipchuk 999 Impact modes in discrete vibrating systems with rigid barriers

G.M. Mahmoud 1013 A theorem for n-dimensional strongly non-linear dynamical systems

Number 7

R.K.L. Sripada and D. Angirasa 1019 Simultaneous heat and mass transfer by natural convection above upward facing horizontal surfaces

H.R. Öz 1031 Non-linear vibrations and stability analysis of tensioned pipes conveying fluid with variable velocity

A.H. Kara and C.M. Khalique 1041 Conservation laws and associated symmetries for some classes of soil water motion equations

C.-S. Liu	1047	Cone of non-linear dynamical system and group preserving schemes
A. El-Gohary and A.M. Hussein	1069	On the control of a rigid body using internal point masses I. Stabilization of an equilibrium position
H.-K. Hong and C.-S. Liu	1075	Some physical models with Minkowski spacetime structure and Lorentz group symmetry
H. Demiray	1085	Localized travelling waves in a prestressed thick elastic tube
K.K. Shukla and Y. Nath	1097	Analytical solution for buckling and post-buckling of angle-ply laminated plates under thermomechanical loading
D.W. Raboud, A.W. Lipsett, M.G. Faulkner and J. Diep	1109	Stability evaluation of very flexible cantilever beams
M.H. Dado	1123	Variable parametric pseudo-rigid-body model for large-deflection beams with end loads
H.J. Pradlwarter	1135	Non-linear stochastic response distributions by local statistical linearization
Q. Wu and N. Sepehri	1153	On Lyapunov's stability analysis of non-smooth systems with applications to control engineering
A. San Miguel	1163	Instability of sleeping asymmetric tops under dissipative perturbations
H.M. Yehia	1173	On certain integrable motions of a rigid body acted upon by gravity and magnetic fields

Number 8

	1177	Note from the Editor-in-Chief
J.F. Wilson	1179	Energy threshholds for tumbling springs
D.E. Adams and R.J. Allemang	1197	Residual frequency autocorrelation as an indicator of non-linearity
J. Kuang, S. Tan, K. Arichandran and A.Y.T. Leung	1213	Chaotic dynamics of an asymmetrical gyrostat
W.Q. Zhu, Z.L. Huang and Y. Suzuki	1235	Response and stability of strongly non-linear oscillators under wide-band random excitation
J.-H. Min and A. Wineman	1251	Scission induced by circular shear and heat conduction in an elastomeric cylinder
R.N. Ray and B.S. Mazumder	1263	Hall effects on hydromagnetic falling liquid film
